

ReFLEX CES's IP Cores/Tools Export Classifications

ReFLEX CES Part Number	ECCN #	License Exception	HTS #	Description	COO
Quartus Development Kit Edition	EAR99	NLR	8523.49.4000	Intel Development Software	US
OpenCL SDK and BSP	3D991	NLR	8523.49.4000	Intel/ReFLEX CES Development Software	US

ReFLEX CES's IP cores/tools are subject to US export controls, whether or not they are exported directly from the US or delivered from an international location to our customers. US export controls also govern re-exports of ReFLEX CES's IP cores/tools as they are US-origin products. ReFLEX CES's standard IP cores/tools are not governed by International Traffic in Arms Regulations (ITAR), or the United States Munitions List (USML), which are administered by the Department of State.

The applicable export controls promulgated by the US Department of Commerce, Bureau of Industry and Security (BIS) are established based on the export classification of the particular IP core/tool. The Export Control Classification Number (ECCN) of ReFLEX CES's IP cores/tools is determined using the Commodity Classification List. The "exporter-of-record" or re-exporter (for shipments from non-US locations) is responsible for determining the ECCN; this responsibility may not be shifted to other parties. Regardless of the ECCN, US export controls prohibit the export or re-export to specified end users (e.g., the Denied Parties Listing) and end for end uses (e.g., for use in missile technology, etc.). Note also that certain countries maintain import controls with which the export and/or importer are required to comply.

Please note that once an IP core is incorporated into a logic design and/or programmed into an Intel PLD/FPGA device, the logic design and/or programmed device must be classified based on the functionality of the specific program and/or device into which the program has been implemented.

We have provided above the current ECCN numbers and other information for certain IP cores/tools for reference purposes. In addition, regardless of ECCN classifications, US export control laws have certain general prohibitions upon the exports/re-exports to certain countries, end uses and end users.

The export classifications and guidance contained in this document are being provided as an accommodation. ReFLEX CES makes no representations, warranties or guaranties, implied or express, as to the information contained herein, including as to the timeliness, accuracy or completeness. Nor may you rely upon the information contained herein for any purpose. The information contained in this document and the applicable export control laws may be changed without notice.
